

CLAIMS**WE CLAIM:**

1. A container comprising:

complementary panels foldably joined along a hinge member;

at least one tray adapted for receiving at least one item, attached to a respective one of said complementary panels; and

locking mechanism for selectively retaining said complementary panels in face-to-face relationship with one another.

2. A container comprising:

complementary panels foldably joined along a hinge member;

complementary trays attached to respective said complementary panels disposed for alignment with one another when said complementary panels are folded into face-to-face relationship with one another, at least one of said complementary trays adapted for receiving at least one object; and

locking mechanism for selectively retaining said complementary trays in face-to-face relationship with one another.

3. The container of claim 2, wherein at least one of said complementary trays including a compartment.

4. The container of claim 2, wherein said complementary trays include respective compartments disposed for forming a cavity when said complementary trays are disposed in face-to-face relationship with one another.
- 5 5. The container of claim 2, said locking mechanism comprising said complementary trays having respective engagement members adapted for cooperatively receiving one another when said complementary trays are urged into face-contacting relationship with one another.
- 10 6. The container of claim 5, said respective engagement members comprising said complementary trays having corresponding male and female engagement elements.
- 15 7. The container of claim 2, further comprising grasping elements for facilitating separation of said complementary trays from face-contacting relationship.
8. The container of claim 7, said grasping elements comprising at least one of said complementary trays having a recessed region.
- 20 9. The container of claim 7, said grasping elements comprising at least one of said complementary trays having at least one flange extending along a respective edge of said complementary tray.
- 25 10. The container of claim 7, at least one of said complementary trays having a flange extending along each respective non-hinged perimeter edge.
- 11.
